## 1. Introduction

This document contains the wholesale elements of Welsh Water's water and sewerage charges for information only. The 'end user' charges are published separately in Welsh Water's Scheme of Charges document which also includes the general conditions of service and a definition of terms.

Under current legislation customers whose water consumption is over 50 million litres a year are eligible to replace Welsh Water with a licensee in respect of their water supply. The wholesale water charges for these non-household customers contained within this document may be of relevance to both these customers and water supply licensees.

For further information in respect of the water supply licensing regime as it applies in Welsh Water's area please refer to Welsh Water's Access Code and the Wholesale Common Contract accessible at:

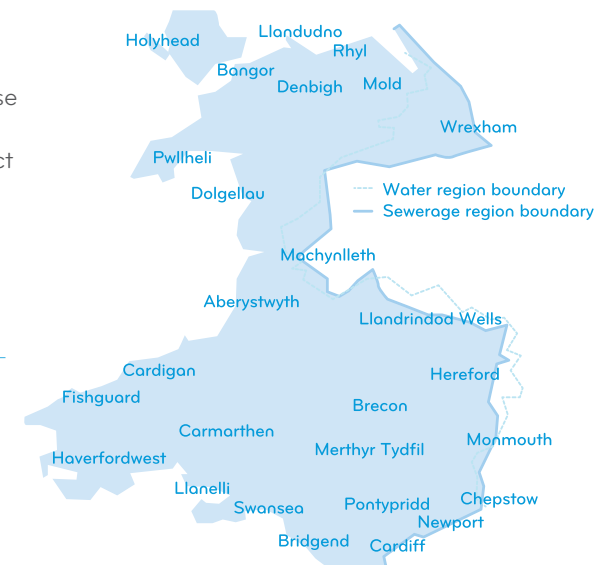

[www.dwrcymru.com/en/Business/Regulation-and-Competition.aspx](http://www.dwrcymru.com/en/Business/Regulation-and-Competition.aspx)

The Access Code contains standard policies common to all water undertakers and the requirements that will apply for access to Welsh Water's supply system. Any contract between a licensee and Welsh Water will follow the template of the Wholesale Common Contract and the standard terms and conditions set out in that document.

Charges published in this schedule are indicative only. Where applicable actual charges may vary according to the licensees specific requirements.
